Highlights BUY or SELL to direct user to search results OR options to create a listing

Enter a location by city, address, or zip code. Or launch boundary tool to select an area.

Apply search filters.
Filters are separated
by importance that
was determined
via our surveys

Uses GPS location to list recent listings near you

Selecting a filter to apply will lead to a separate screen to apply constraints (poss slider bar) or input further info.

Clicking on a home will lead to a new page that lists ALL home details in addition to the photo view tool

Phone 1 - Main screen provides starting point for user to enter City, State, Zip, or Address.

App will then by default show all houses for sale.

Phone 2 - After initial default search, a Filter or Options tab will be available. Clicking this will slide open a menu (from left to right) that allows user to enter desired traits (bedrooms, price range, size, schools, shopping, etc.).

Phone 3 - App shows houses for sale (green star), recently sold houses (red X), and saved favorites (red heart).

Bottom portion of App will allow user to scroll thru cover photo (picture of front of house?) of the houses for sale in the viewable area.

Clicking photos or colored icons will take user to the house listing.
